ITEM 81A/02

SUBJECT: LUCAS HAND HELD TESTER KIT - P/N BLT 5010

MODELS: All

INCREASE THE PROFIT POTENTIAL OF YOUR SERVICE DEPARTMENT

Dealers are reminded of the availability of the kits of hand held diagnostic testers for battery, alternator and starter system checking.

DIAGNOSIS TIME IS CUT DRASTICALLY

These testers are invaluable in reducing costly diagnosis time and, when used in the service reception area, a convincing visible demonstration of a malfunction can be made to a customer.

THE KIT IS A SOUND INVESTMENT

The extremely low price of \$78.00 will easily be recovered in a short time by the reduction of technicians' diagnostic time and the expensive removal and replacement of components which are indeed serviceable.

TALK TO YOUR DISTRICT SERVICE MANAGER

Your District Service Manager or Zone Service Department will provide details of the Counted Courte Shawn. kit and its many uses. Orders should be placed through your normal Jaguar Rover Triumph Inc. parts channels quoting part number BLT 5010.
