

TECHNICAL SERVICE BULLETIN

October 1981

Date

ITEM T81/18

SUBJECT: E.F.I. EPITEST CHECK SHEETS

MODELS: TR7; TR8 E.F.I.

A thorough diagnosis is important when investigating conditions relating to the electronic fuel injection system, therefore an Epitest check sheet must accompany any of the following parts relating to E.F.I. claims:

- Electronic Control Unit (ECU)
- Air Flow Meter
- Throttle Switch
- Temperature Sensors, air and water
- Fuel Pressure Regulator
- Main Injector
- Cold Start Injector
- Thermotime Switch
- Fuel Pump
- Fuel Filter
- Relay
- Power Resistor
- Throttle Potentiometer
- Extra Air Valve

Effective October 15, 1981, if any of the above material is received without an Epitest sheet it will be returned and the claim will be rejected. Should you wish to resubmit the claim it must be renumbered and the test sheet is to be kept with the material so that they can be forwarded together. Do not send test sheets in with claim copies.
